Mercadien Technologies has become the Mid-Atlantic leader in Forensic Data Consulting. The Mercadien Group's expert reputation in Forensic Accounting provided the perfect backdrop for their technology division to assemble a team of experts offering advanced investigative services in the evidence collection process.

Our team is versed in both civil and criminal cases with expertise in Electronic Discovery, Computer Forensics, Data Recovery, Court Testimony, Corporate Internal Investigations and Preventative Services. These services are vital to any individual, company, or law practice with cases that deal with sensitive information stored on digital media, including hard drives, cell phones, digital cameras, pda's, cd's, dvd's, flash cards, or tapes.

Mercadien's Forensic Data practice utilizes experts skilled in ensuring that all digital data has been handled within the legal principles of security, continuity and accountability. The integrity of Mercadien's processes and procedures will withstand the challenges presented in a court of law.

Mercadien is able to provide our forensic clients with the following results, which may be required in a court of law:

- ✓ *Exhibiting evidence specifying the facts that will support a conclusion or judgment*
- ✓ *A Mercadien employee who acts as an expert witness to give a first hand account of the processes and tools involved in the forensic procedure*
- ✓ *A forensic report stating how the media was treated and how the forensic testing was performed*
- ✓ *A report log providing a detailed chain of custody for the media.*

Extensive information and insight about the law and technology related to the practice of computer forensics and electronic discovery
